Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. **Claims 1-25** have been examined.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-6, 13-19 and 24-25 drawn to an apparatus and a method of power consumption, classified in class 713, subclass 300.
- II. Claim 7-11 and 21-22, drawn to an apparatus and a method of signal encryption and decryption using code signal, classified in class 380, subclass 239.
- III. Claim 20, drawn to an apparatus and a method of signal communication between multiple party using positive and negative logic to have an inverse effect on the scan signal, classified in class 380, subclass 222.
- IV. Claims 12 and 23, drawn to an apparatus and a method of using randomization or changing the order of transfer of data in crypto communication between multiple computers, classified in class 713, subclass 150.

Art Unit: 2132

1. Inventions I, II, III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as power consumption. Invention II has separate utility such as control code signal encryption; Invention III has separate utility such as having inverse signal buy using positive and negative logic on the signal line. Invention IV has separate utility such as randomization of data during transmission of data between the memories of multiple entities. See MPEP § 806.05(d).

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. Because these inventions are distinct for the reasons given above and the search required for any one Group is not required for any other Group, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2132

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Examiner suggests election of invention II or III or IV that directly are under jurisdiction of art unit 2130s, where the current restriction on the claims are implemented in order to expedite the prosecution of the application.

In case of Election of Invention I by the Applicant, the application will be transferred to Art unit 2185 for further examination of the claims of invention I, for possible further restriction or examination of the elected claims invention.
